Dear Mr Bellis,

Your magnesium chloride sample yielded the following data when analysed for heavy metals by ICP:

Ca 14.033ppm

Na 1.582ppm

Ni 0.260ppm

Sn 0.035ppm

Sr 0.251ppm

Mn 0.013ppm

Pb 0.230ppm

Si 0.439ppm

Fe 0.074ppm

The mercury content was analysed separately as it is not included in our standard ICP programme. The mercury level was found to be below the limit of detection (0.5ug/l at 184.95 nm).

Yours sincerely,

Angie Williams
